DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the filter being placed so that it can "filter said beverage . . . after processing" must be shown (see claims 30 and 36) or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 24-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 24, 35, and 37 are indefinite because the scope of the term "about" is indefinite.

Claims 24 and 36 are indefinite because the scope of the phrase "partially aged beverage" is not known.

Claims 25 and 38 are indefinite because it is not clear what the "interchangeable cartridge" is interchangeable with.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 36 and 39-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Apeldoorn et al. (U.S. Pat. No. 5,980,694)(hereinafter Apeldoorn).

Apeldoorn teaches the use of various apparatuses that includes closed system of piping which has various pumps, an inlet, several heat exchangers, a filter (5) and valves and a container. See Fig. 1-3. Several tanks are attached that could function to flush the system. The claims contain numerous phrases, such as, “for processing an unaged or partially aged beverage,” for injecting gas or air,” etc., that are considered to refer to intended uses of the claimed apparatus and, therefore, are not limitations upon the claims.
